

How to watch a film through the app

There is an app available for iOS, Android and Apple TV called “digital TIFF Bell Lightbox”.

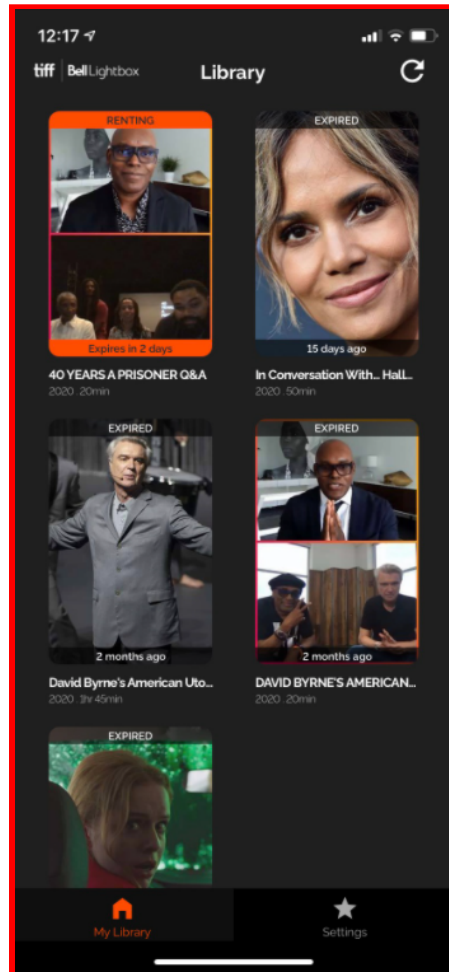

This app is a “player” app only. This means you can not purchase or rent a film through the app, you can simply play items from your library. You will still need to use the browser version of the site to add films to your library or to create an account.

Steps for using the Mobile version of the app:

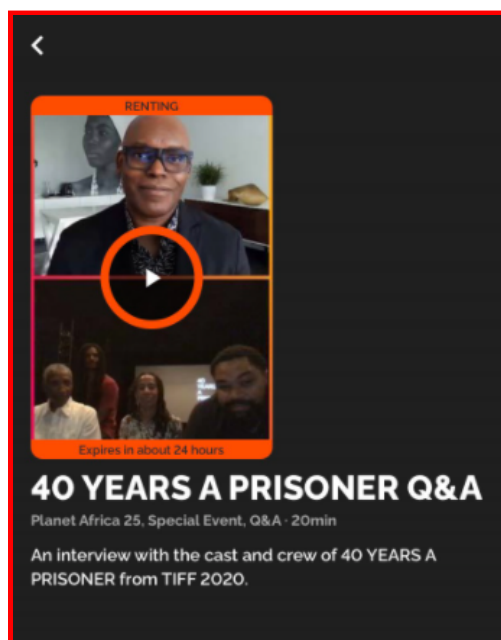

1. The first time you use the app you will need to login using the email address you have purchased or rented films with on the browser version of the site:

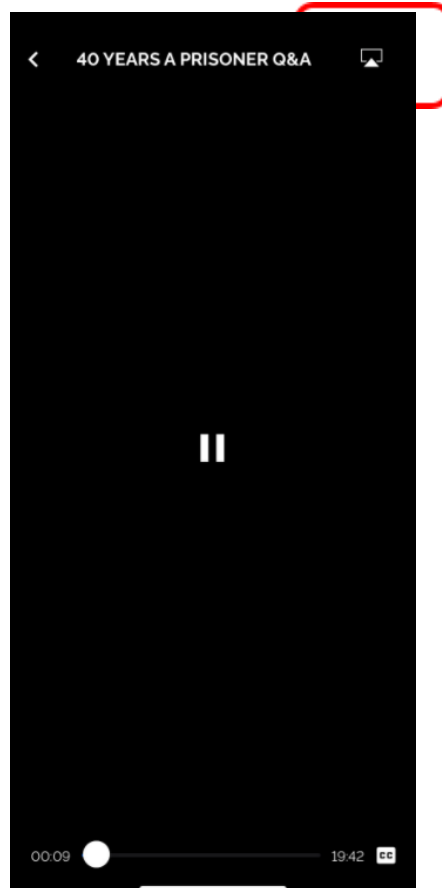

2. Your library will appear in the app after you login:

3. Select the title you wish to watch:

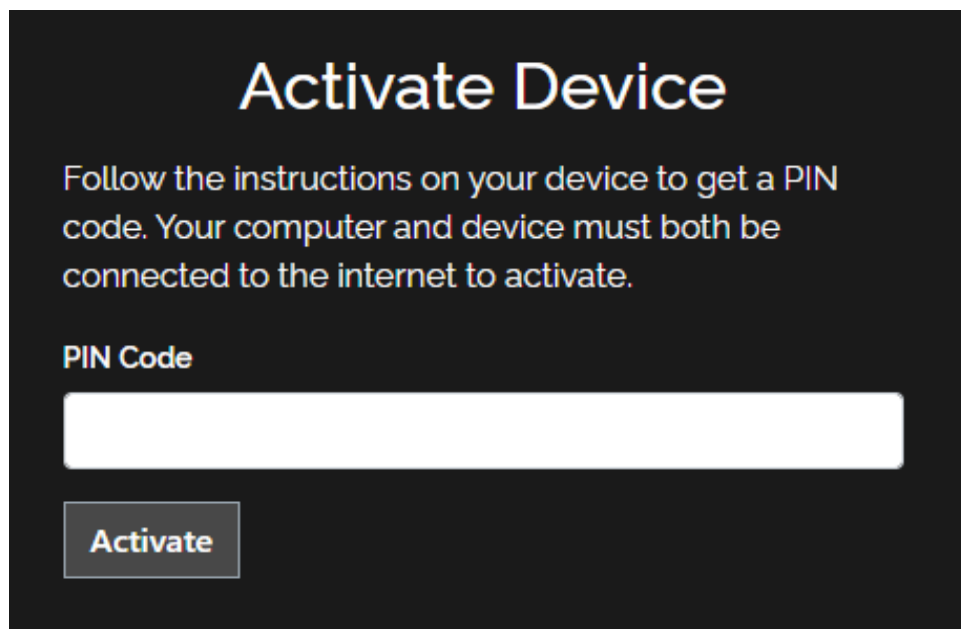

4. Select the icon that appears in the top right corner of the screen in order to cast to your TV. You **must** have Apple TV or Chromecast for this feature to work. The example pictured below is from an iPhone but the icon will be in the same location on an Android as well.

5. If Airplay is not working or there are any issues with your apple device, use this website for guidance: <https://support.apple.com/en-ca/HT204289>. This site offers helpful instructions for using Airplay as well as Screen Mirroring.

Steps for using the Apple TV version of the app:

1. The Apple TV app has two sign-in options: by Email (i.e. enter email address and password), and by Pincode.
2. If they select pin code:
 - a. A pin code will appear on your TV screen.
 - b. Visit digital.tiff.net/pin from your web browser.
 - c. Sign in, and then enter the pin you receive on your Apple TV

Activate Device

Follow the instructions on your device to get a PIN code. Your computer and device must both be connected to the internet to activate.

PIN Code

Activate

3. Follow the instructions from the previous section on how to play a film. You're all set, enjoy the movie!
